

WHY LF LOGISTICS IS THE BEST OF THE BEST IN REGIONAL WAREHOUSING

Frost & Sullivan recognizes LF Logistics for its excellent capabilities in providing extensive warehousing solutions to clients across Asia-Pacific.

LF Logistics' edge over its competitors is based on its robust and reliable IT system integration platform. The digitized online platform features excellent real time tracking data and reliable customer portal to help provide end-to-end visibility for its customers.

Its continuous investments in advanced storage mechanisms and various IT systems have allowed the company to be at the forefront of warehouse innovation.

FROST & SULLIVAN

2017 BEST PRACTICES AWARD

2017 Frost & Sullivan Asia-Pacific Regional Warehouse Service Provider of the Year

Customer experience is one of the major factors in determining a company's performance. LF Logistics understands the importance of meeting customer needs and its warehouse service portfolio is designed to provide efficient, eco-friendly, cost-effective solutions. These business elements have allowed the company to establish successful partnerships with major international clients in the region, enhancing its image and brand value in the industry.

The company has 235 distribution centers in 14 countries across Asia-Pacific, including Hong Kong, Japan, Singapore, China, Taiwan, South Korea, Malaysia, Thailand, Philippines, Indonesia, India, Pakistan, Vietnam, and Cambodia. The vast network enables LF Logistics to offer complete, flexible, tailor-made warehouse solutions across numerous sectors including Footwear & Apparel, Fast-moving consumer goods (FMCG), Food and Beverage (F&B), Healthcare, and Electronics.

LF Logistics' expertise extends across the supply chain which includes advanced data analytics systems, online platform integration, transport, freight forwarding, and value-added solutions.

LF Logistics continues to grow from strength to strength as it implements several strategies which would allow it to achieve leadership in the Asia-Pacific warehouse industry. The company uses semi-autonomous features such as drones in inventory management, automated drive-in storage system, and LF Logistics "Smartcart" technology to provide efficient and cost effective solutions, maximize supply chain value, and improve warehouse facilities for its customers.

In recognition of its continuous efforts on digital innovation and solution efficiency, and market leadership in the region, Frost & Sullivan is pleased to present the 2017 Frost & Sullivan Asia-Pacific Regional Warehouse Service Provider of the Year to LF Logistics.
